DETAILED ACTION

Allowable Subject Matter

Claim 9 is allowable.

The following is an examiner's statement of reasons for allowance: claim 9 is allowed because the references cited fail to teach, as applicant has a delay amount control circuit for controlling the delay circuits of the two transmission units on the basis of the comparison signal output from the comparator so that the modulation timing is coincident at transmission output terminals of the two transmission units where the base band signal is subjected to ON/OFF control, the rising timing and falling timing of the detection output when the ON/OFF control is carried out are compared with each other by the comparator, and the delay circuits are controlled by the delay amount control circuit so that the difference between the rising timing and the falling timing is within a permissible time range, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
